## **Definitions, Abbreviations, and Explanatory Notes**

---

**Fiscal Year:** The abbreviation FY stands for fiscal year; all years are calendar years unless otherwise indicated.

**GDP and GNP:** GDP is the total market value of all goods and services produced within the domestic borders of a country over a particular time period, normally a year. GNP equals GDP plus the income accruing to domestic residents arising from investment abroad less income earned in the domestic market accruing to foreigners abroad.

**Imports, Exports, and Aid:** Standard abbreviations used in individual entries throughout this factbook are c.i.f. (cost, insurance, and freight), f.o.b. (free on board), ODA (official development assistance), and OOF (other official flows).

**Land Utilization:** Most of the land utilization percentages are rough estimates. Figures for "arable" land in some cases reflect the area under cultivation rather than the total cultivable area.

**Maritime Zones:** Fishing and economic zones claimed by coastal states are included only when they differ from territorial sea limits. Maritime claims do not necessarily represent the position of the United States Government.

**Money:** All money figures are in contemporaneous US dollars unless otherwise indicated.

**Oil Terms:** Barrel (bbl) and barrels per day (b/d) are used to express volume of crude oil and refined products; a barrel equals 42.00 gallons, 158.99 liters, 5.61 cubic feet, or 0.16 cubic meters.

*Note:* Some of the countries and governments included in this publication are not fully independent, and others are not officially recognized by the United States Government.

### Government

**NOTE:** Between early 1975 and late 1976 Lebanon was torn by civil war between its Christians—then aided by Syrian troops—and its Muslims and their Palestinian allies. The cease-fire established in October 1976 between the domestic political groups generally held for about six years, despite occasional fighting. Syrian troops constituted as the Arab Deterrent Force by the Arab League have remained in Lebanon. Syria's move toward supporting the Lebanese Muslims and the Palestinians and Israel's growing support for Lebanese Christians brought the two sides into rough equilibrium, but no progress was made toward national reconciliation or political reforms—the original cause of the war.

Continuing Israeli concern about the Palestinian presence in Lebanon led to the Israeli invasion of Lebanon in June 1982. Israeli forces occupied all of the southern portion of the country and mounted a summer-long siege of Beirut, which resulted in the evacuation of the PLO from Beirut in September under the supervision of a multinational force made up of US, French, and Italian troops.

Within days of the departure of the multinational force (MNF), Lebanon's newly elected president, Bashir Gemayel, was assassinated. In the wake of his death, Christian militia men massacred hundreds of Palestinian refugees in two Beirut camps. This prompted the return of the MNF to ease the security burden on Lebanon's weak army and security forces. In late March 1984 the last MNF units withdrew.

Lebanon continues to be occupied by Israel in the south and by Syria in the north and east. Israel and Lebanon signed a withdrawal agreement on 17 May 1983. The agreement was never implemented and was subsequently voided. A partial Israeli withdrawal and government attempts to extend its authority have led to renewed factional fighting. The following description is based on the present constitutional and customary practices of the Lebanese system.

*Official name:* Republic of Lebanon

*Government leader:* Amine Pierre GEMAYEL, President (since September 1982); Rashid KARAMI, Prime Minister (since May 1984)

*Suffrage:* compulsory for all males over 21; authorized for women over 21 with elementary education

*Elections:* National Assembly held every four years or within three months of dissolution of Chamber; security conditions have prevented parliamentary elections since April 1972

## West Bank and Gaza Strip

**NOTE:** the war between Israel and the Arab states in June 1967 ended with Israel in control of the West Bank and the Gaza Strip. As stated in the 1978 Camp David Accords and reaffirmed by the President's 1 September 1982 peace initiative, the final status of the West Bank and the Gaza Strip, their relationship with their neighbors, and a peace treaty between Israel and Jordan are to be negotiated among the concerned parties. Camp David further specifies that these negotiations will resolve the respective boundaries. Pending the completion of this process, it is US policy that the final status of the West Bank and the Gaza Strip has yet to be determined. In the view of the United States, the term "West Bank" describes all of the area west of the Jordan River under Jordanian administration before the 1967 Arab-Israeli war. However, with respect to negotiations envisaged in the framework agreement, it is US policy that a distinction must be made between Jerusalem and the rest of the West Bank because of the city's special status and circumstances. Therefore, a negotiated solution for the final status of Jerusalem could be different in character in some respects from that of the rest of the West Bank.
